This application is in condition for allowance except for the following formal matters:

Amended claims 25-27 are similar to original claim 9 which is directed to the embodiments of Figs. 1(C) and 3(A). See page 3 of the Office action dated October 26, 1994, Paper No.4. Therefore, claims 25-27 are withdrawn from consideration as being directed to a non-elected invention. Also, claims 6-8 are also withdrawn from consideration as being directed to a non-elected species *without* traverse (Paper No. 5). See 37 CFR 1.142 (B) and MPEP 821.03.

In addition, the specification does not disclose what "the first means for applying a first signal" and "the second means for applying a second signal" of claim 25 are.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claims 1, 5, 21 and 22 are allowable over JP 1-156725 (JP'725) because the JP'725 is silent about "the capacitance between the pixel electrode and the gate line, and the capacitance between the pixel electrode and the wiring being the same as each other" or "not more than one tenth of the sum of the area shared by the first gate line and the first pixel electrode and the area shared by the second gate line and the first pixel electrode". Also, see Applicant's remarks on pages 4 and 5 of the Remarks.
